**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1 and 16 are objected to because of the following informalities: A comma (,) is missing after "base" in line 2. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
4. Each U-clip has a base and two arms. How a plurality of clips can be positioned in the base? Such a feature is neither shown nor described.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-8, 10-18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanzawa et al. (5231685).

Art Unit: 2839

Hanzawa (Figures 1- 29) shows an apparatus comprising a generally U-shaped clip 3 having a base, a first arm, a second arm to form a channel to receive a cylindrical sleeve 9, 10 and a plurality of optical components (fibers) 21 positioned off center from the axis of the sleeve. One arm is rigid and the other arm is flexible to squeeze the sleeve. The sleeve can be rotated and slid to alter x, y and z coordinates of the optical component. A lens formed at the end of the optical element is inherent. The arms have notches 18 which can be used solder, epoxy or weld the sleeve in place.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hanzawa et al. (5231685).

Hanzawa shows all the features of this claim except the optical component being a laser diode. Laser diode are widely used and well known in the art of optical fibers. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to use a laser diode as the optical component because it would provide an easily available and widely used source of power in fiber optics.

Art Unit: 2839

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Briggs et al. (5386487), Miyokawa et al. (6720582) and Carney et al. (5100221).
